1 Foreword

The project

ATHIKA project proposes to explore innovative approaches for technologically advanced training and support that explicitly integrates humanistic concerns, aimed at increasing the successful implementation of ICT – Internet of Things, Big Data and Artificial Intelligent Systems integrated into Decision-Support Systems, for the healthcare sector of European companies and ventures.

ATHIKA will combine training and competition activities with a set of workshops and symposiums in order to design and develop new courses on technology, innovation and the digitalization of healthcare.

The 1st ATHIKA Symposium on eHealth Challenge Identification and Analysis

The 1st ATHIKA Symposium on e-Health Challenge Identification and Analysis will take place on the 27th of June in Barcelona, Spain. This event will be open to all targeted audiences and lead to both the identification of e-health innovation challenges, drivers, and barriers, as well as to the growth of health innovation synergies with other knowledge fields such as Smart Cities.

In order to evaluate the success and impact of this event we developed an evaluation questionnaire for Symposiums.

3

2 Methodology

We will carry out a survey which includes a mix of qualitative and quantitative feedback to evaluate the success and impact of the event. We will use the Mentimeter software (<https://www.mentimeter.com>), a user-friendly survey platform, to engage with the audience.

The survey will take in consideration for example:

- the effectiveness of the symposium including its reach of the target audience
- the impact of the programme
- the strengths and weaknesses of the symposium approach used
- recommendations, feedback or suggestions

In this document we present a questionnaire that we have prepared to support the improvement of the programme.

2.1 Evaluation questionnaires for Symposiums

Q1) How useful did you find the 1st ATHIKA Symposium on eHealth Challenge Identification and Analysis?

- Very useful
- Useful
- Neutral

- Interesting, but not that helpful
- Not very useful

Q2) What words come to your mind after hearing the panellists?

Q3) How would you rate the quality of the speakers?

- Excellent
- Good
- Neutral
- Poor

Q4) How would you rate the overall experience?

- Excellent
- Good
- Neutral
- Poor

Q5) Could you suggest us any improvement?

Q6) Which panel did you enjoy the most?

- Panel IoT
- Panel AI & Data Analytics
- Panel Governance & Ethics

Q7) Please, could you help us identifying relevant challenges in e-health?

Q8) Any overall comments, feedback, or suggestions?
