1 Foreword

The project

ATHIKA project proposes to explore innovative approaches for technologically advanced training and support that explicitly integrates humanistic concerns, aimed at increasing the successful implementation of ICT – Internet of Things, Big Data and Artificial Intelligent Systems integrated into Decision-Support Systems, for the healthcare sector of European companies and ventures.

ATHIKA will combine training and competition activities with a set of workshops and symposiums in order to design and develop new courses on technology, innovation and the digitalization of healthcare.

Learning mobility

During the mobility, Company partners will work closely with the students (remote and face-to-face) to develop a proof of concept. The aim of this Mobility is, on one hand, to support the students implementing their application to have a better understanding on the effectiveness of the workshops done during the Online Course, Itinerary and the results of what the students design.

The mobility, supported by the coaching plan will help students to put into practice what they have learnt during the course, and give the companies possibility to guide them to reach tangible results to develop eHealth applications that solve real problems.

In order to evaluate the success and impact of this event we developed questionnaires for each mobility. ³

2 Methodology

We carried out a survey which included a mix of qualitative and quantitative feedback to evaluate the success and impact of the event. The questionnaire was done in the Google Forms.

The survey took in consideration for example:

- the effectiveness of the internship
- the impact of the internship
- recommendations, feedback or suggestions

In this document we present a questionnaire that we have done to support the improvement of the learning mobility.

3 Evaluation questionnaires for Learning Mobility

Q1) Please enter your name and surname.

- Open question

Q2) In which company or companies did you have your internship experience?

- Open question

Q3) How would you rate your experience in our company?

1 Poor

5 Excellent
